| Group One—For Possible “Relief Emergency” Use |                                                                                                                                                                                                           |
|-----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Number                                        | Meaning                                                                                                                                                                                                   |
| ONE                                           | Everyone safe here. Please don't worry.                                                                                                                                                                   |
| TWO                                           | Coming home as soon as possible.                                                                                                                                                                          |
| THREE                                         | Am in _____ hospital. Receiving excellent care and recovering fine.                                                                                                                                       |
| FOUR                                          | Only slight property damage here. Do not be concerned about disaster reports.                                                                                                                             |
| FIVE                                          | Am moving to new location. Send no further mail or communication. Will inform you of new address when relocated.                                                                                          |
| SIX                                           | Will contact you as soon as possible.                                                                                                                                                                     |
| SEVEN                                         | Please reply by Amateur Radio through the amateur delivering this message. This is a free public service.                                                                                                 |
| EIGHT                                         | Need additional _____ mobile or portable equipment for immediate emergency use.                                                                                                                           |
| NINE                                          | Additional _____ radio operators needed to assist with emergency at this location.                                                                                                                        |
| TEN                                           | Please contact _____. Advise to standby and provide further emergency information, instructions or assistance.                                                                                            |
| ELEVEN                                        | Establish Amateur Radio emergency communications with _____ on _____ MHz.                                                                                                                                 |
| TWELVE                                        | Anxious to hear from you. No word in some time. Please contact me as soon as possible.                                                                                                                    |
| THIRTEEN                                      | Medical emergency situation exists here.                                                                                                                                                                  |
| FOURTEEN                                      | Situation here becoming critical. Losses and damage from _____ increasing.                                                                                                                                |
| FIFTEEN                                       | Please advise your condition and what help is needed.                                                                                                                                                     |
| SIXTEEN                                       | Property damage very severe in this area.                                                                                                                                                                 |
| SEVENTEEN                                     | REACT communications services also available. Establish REACT communication with _____ on channel _____.                                                                                                  |
| EIGHTEEN                                      | Please contact me as soon as possible at _____.                                                                                                                                                           |
| NINETEEN                                      | Request health and welfare report on _____. (State name, address and telephone number.)                                                                                                                   |
| TWENTY                                        | Temporarily stranded. Will need some assistance. Please contact me at _____.                                                                                                                              |
| TWENTY ONE                                    | Search and Rescue assistance is needed by local authorities here. Advise availability.                                                                                                                    |
| TWENTY TWO                                    | Need accurate information on the extent and type of conditions now existing at your location. Please furnish this information and reply without delay.                                                    |
| TWENTY THREE                                  | Report at once the accessibility and best way to reach your location.                                                                                                                                     |
| TWENTY FOUR                                   | Evacuation of residents from this area urgently needed. Advise plans for help.                                                                                                                            |
| TWENTY FIVE                                   | Furnish as soon as possible the weather conditions at your location.                                                                                                                                      |
| TWENTY SIX                                    | Help and care for evacuation of sick and injured from this location needed at once. Emergency & priority messages originating from official sources must carry the signature of the originating official. |

| Please observe the following ARRL provisions for PRECEDENCE'S in connection with written message traffic. These provisions are designed to increase the efficiency of our service both in normal times and in emergency. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Precedence                                                                                                                                                                                                               | Meaning                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>EMERGENCY</b>                                                                                                                                                                                                         | Any message having life and death urgency to any person or group of persons, which is transmitted by Amateur Radio in the absence of regular commercial facilities. This includes official messages of welfare agencies during emergencies requesting supplies, materials or instructions vital to relief of stricken populace in emergency areas. During normal times, it will be very rare. On CW/RTTY, this designation will <i>always</i> be spelled out. When in doubt, do not use it. |
| <b>PRIORITY</b>                                                                                                                                                                                                          | Use abbreviation P on CW/RTTY. This classification is for a) important messages having a specific time limit, b) official messages not covered in the emergency category, c) press dispatches and emergency-related traffic not of the <i>utmost</i> urgency d) notice of death or injury in a disaster area, personal or official.                                                                                                                                                         |
| <b>WELFARE</b>                                                                                                                                                                                                           | This classification, abbreviated as W on CW/RTTY, refers to either an inquiry as to the health and welfare of an individual in the disaster area or an advisory from the disaster area that indicates all is well. Welfare traffic is handled only after all emergency and priority traffic is cleared. The Red Cross equivalent to an incoming Welfare message is DWI (Disaster Welfare Inquiry).                                                                                          |
| <b>ROUTINE</b>                                                                                                                                                                                                           | Most traffic in normal times will bear this designation. In disaster situations, traffic labeled Routine (R on CW/RTTY) should be handled last, or not at all when circuits are busy with higher precedence traffic.<br>Note: The precedence always follows the message number. For example, a message number may be 207R on CW and "Two Zero Seven Routine" on phone.                                                                                                                      |

| <b>IV. Signature</b>                                                                                                   | <ul style="list-style-type: none"> <li>• <b>CW:</b> The prosign <b>AA</b> separates the parts of the address. <b>BT</b> separates the address from the text and the text from the signature. <b>AR</b> marks end of message; this is followed by B if there is another message to follow, by N if this is the only or last message. It is customary to copy the preamble, parts of the address, text and signature on separate lines.</li> <li>• <b>RTTY:</b> Same as CW procedure above, except (1) use extra space between parts of address, instead of <b>AA</b>; (2) omit CW procedure sign <b>BT</b> to separate text from address and signature, using line spaces instead; (3) add a CFM line under the signature, consisting of all names, numerals and unusual words in the message in the order transmitted.</li> <li>• <b>PACKET/AMTOR BBS:</b> Same format as shown in the CW message example above, except that the <b>AA</b> and <b>AR</b> prosigns may be omitted. Most amtor and packet BBS software in use today allows formal message traffic to be sent with the “ST” command. Always avoid the use of spectrum-wasting multiple line feeds and indentations.</li> <li>• <b>PHONE:</b> Use <i>prowords</i> instead of prosigns, but it is not necessary to name each part of the message as you send it. For example, the above message would be sent on phone as follows: “Number one routine HX Golf W1AW eight Newington Connecticut one eight three zero zulu july one Donald Smith Figures one six four East Sixth Avenue North River City Missouri zero zero seven eight nine Telephone seven three three four nine six eight Break Happy birthday X-ray see you soon X-ray love Break Diana End of Message Over. “End of Message” is followed by “More” if there is another message to follow, “No More” if it is the only or last message. Speak clearly using VOX (or pause frequently on push-to-talk) so that the receiving station can get fills. Spell phonetically all difficult or unusual words--do not spell out common words. Do not use cw abbreviations or Q-signals in phone traffic handling.</li> </ul> |

| <p>If the signal has the characteristic steadiness of crystal control, add the letter 'X' to the RST report to indicate this. If there is a chirp, add the letter 'C' to the RST report to indicate this. If there is a click, add the letter 'K' to the RST report to indicate this. The above reporting system is used on both CW and voice, leaving out the "tone" report on voice.</p> |                                                    |                 |                                    |          |                                                             |

| * 0000 and 2400 are interchangeable. (2400 is associated with the date of the day ending, 0000 with the day just starting.) Universal Coordinated Time (UTC) is the time at the zero or reference meridian. Time changes one hour with each change of 15 degrees in longitude. The five time zones in the US proper and Canada roughly follow these lines. |         |         |         |         |       |        |                 |

## Operating Reference

| NPSTC Standard Channel Nomenclature for the Public Safety Interoperability Channels ( <a href="#">LINK</a> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| <p style="text-align: center;"><b>Standardized Naming Format</b></p> <p>Each FCC-designated Interoperability Channel in the Public Safety Radio Services (47CFR Part 90) will have a unique name developed according to a standardized format. Tables 1 and 2 show the FCC designated Interoperability Channels and the related Channel Name. This format consists of a maximum of eight characters, as follows:</p> <p style="text-align: center;"><b>Btype##M</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| <p style="text-align: center;"><b>“B” Spectrum Band</b></p> <p>The Spectrum Band designator is a unique single alpha or numeric character to designate the public safety spectrum segment the channel is found within:</p> <ol style="list-style-type: none"> <li><b>V</b> VHF High Band (150.8 – 162.0 MHz).</li> <li><b>U</b> UHF Band (450 – 470 MHz).</li> <li><b>7</b> 700 MHz Public Safety Band. As the spectrum for voice communications use in this band is currently further divided into two individual blocks, for interoperability channel numbering purposes these blocks are identified as follows: <ul style="list-style-type: none"> <li><b>“A” Block:</b> Television Channels 63 and 68</li> <li><b>“B” Block:</b> Television Channels 64 and 69</li> </ul> </li> <li><b>8</b> 800 MHz NPSPAC band <b>after the rebanding process</b> (806 – 809 / 851 – 854 MHz).</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                               |  |
| <p style="text-align: center;"><b>“type” Channel Use Designator</b></p> <p>The Channel Use Designator is an alphanumeric three- or four-place tag to signify the primary purpose of operations on the channel. In some cases, the Channel Use has been specified in FCC Rules or related Orders.</p> <ol style="list-style-type: none"> <li><b>CALL</b> Channel is dedicated nationwide for the express purpose of Interoperability calling only.</li> <li><b>DATA</b> Channel is reserved nationwide for the express purpose of Data transmission only.</li> <li><b>FIRE</b> Primarily used for interagency incident communications by Fire licensees.</li> <li><b>GTAC</b> Primarily used for interagency incident communications between Public Safety eligible entities and eligible non-governmental organizations.</li> <li><b>LAW</b> Primarily used for interagency incident communications by Police licensees.</li> <li><b>MED</b> Primarily used for interagency incident communications by Emergency Medical Service licensees.</li> <li><b>MOB</b> Primarily used for on-scene interagency incident communications by any Public Safety eligible, using vehicular repeaters (FCC Station Class MO3).</li> <li><b>TAC</b> Primarily used for interagency communications by any Public Safety eligible.</li> </ol> |  |
| <p style="text-align: center;"><b>“##” Unique Channel Identifier</b></p> <p>The Unique Channel Identifier is a numeric one- or two-place tag to uniquely identify the specific channel. Channel Identifiers are grouped by band segment as follows:</p> <ol style="list-style-type: none"> <li><b>1-9</b> VHF Low Band (30-50 MHz) [No leading zero used]</li> <li><b>10-39</b> VHF High band (150.8 – 162 MHz)</li> <li><b>40-49</b> UHF band (450 – 470 MHz)</li> <li><b>50-69</b> 700 MHz “A” block (TV 63/68)</li> <li><b>70-89</b> 700 MHz “B” block (TV 64/69)</li> <li><b>90-99</b> 800 MHz “NPSPAC” band (806-809/851-854 MHz) [Post-rebanding]</li> </ol> <p>Notes:</p> <ol style="list-style-type: none"> <li>Starting in VHF High Band, Channel Identifiers are grouped by Channel Use type, with Channel Identifiers ending in “0” reserved for Interoperability Calling use.</li> <li>Channels Identifiers specified for Emergency Medical Services (MED) in this document are numbered to avoid conflict with the FCC’s UHF medical channel naming methodology specified in 47CFR90.20(d)(65) and 47CFR90.20(d)(66)(i).</li> <li>Channel Identifiers not specified in Tables 1 and 2 are reserved for future use.</li> </ol>                                                                                    |  |

| <p style="text-align: center;"><b>Standardized Tone Squelch or Network Access Codes</b></p> <p>The use of a common Continuous Tone Controlled Squelch System (CTCSS) tone of 156.7 Hz for transmit and receive on national Interoperability Channels was originally specified in the NPSPAC proceedings (Docket 87-112). In many areas, the 800 MHz Planning Regions allowed the use of an additional (secondary) access tone for in-</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |

## Operating Reference

cabinet repeat operations, as long as the 156.7 Hz tone was monitored by a live dispatcher or always repeated upon receipt. 156.7 Hz is always transmitted by repeaters.

In the development process of the *Standard Channel Nomenclature for the Public Safety Interoperability Channels*, the NCC Interoperability Committee's Working Group recommended that 156.7 Hz CTCSS transmit and receive be used for all analog voice operations on all interoperability channels in all bands.

For Project-25 (P-25) voice operations, the NCC Working Group initially recommended the 156.7 Hz equivalent Network Access Code (NAC) of \$61F. This recommendation was changed in 2001 to use the default ("carrier squelch equivalent") NAC of \$293.

### Analog Operations:

The use of **CTCSS Tone 156.7 Hz** has been adopted for all analog operations on Interoperability Channels:

1. All (fixed and subscriber) analog transmitters **will** encode 156.7 Hz.
2. Subscriber receivers should be set for carrier squelch operations unless conditions in the area require the use of tone protection to mitigate adjacent channel interference, or interference from intermodulation products. In those cases, receivers will decode 156.7 Hz.
3. Subject to the approval of applicable Statewide Communications Interoperability Plans and/or FCC-approved regional plans, mobile relay stations that are part of a local, regional, or statewide interoperability network may be equipped with a second receive CTCSS tone to provide local ("in cabinet") relay operation, provided:
  - The relay transmitter continues to transmit the common CTCSS tone of 156.7 Hz so that all users within range of the station are aware the station is in use;
  - The relay will accept the common CTCSS tone of 156.7 Hz and present the audio accompanying the 156.7 Hz-encoded transmission for automatic in-cabinet repeat or to a live operator at the appropriate controlling dispatch facility; and
  - The operational configuration of the Mobile Relay Station is published in applicable interoperability resource tracking documents (such as the appropriate Tactical Interoperability Communications Plan, Statewide Communications Interoperability Plan, and/or FCC-approved Regional Plan) and databases (CAPRAD, CASM, and NIIX).

### Digital Operations:

The use of Network Access Code (NAC) \$293 has been adopted for all digital operations on Interoperability Channels:

1. Subject to the approval of applicable Statewide Communications Interoperability Plans and/or FCC-approved Regional Plans, Mobile Relay stations that are part of a Local, Regional, or Statewide interoperability network may be equipped with a second receive NAC to provide local ("in cabinet") relay operation, provided:
  - The relay transmitter continues to transmit the Common NAC of \$293 so that all users within range of the station are aware the station is in use;
  - The relay will accept the Common NAC of \$293 and present the audio accompanying the \$293-encoded transmission for automatic in-cabinet repeat or to a live operator at the appropriate controlling dispatch facility; and
  - The operational configuration of the Mobile Relay Station is published in applicable interoperability resource tracking documents (such as the appropriate Tactical Interoperability Communications Plan, Statewide Communications Interoperability Plan, and/or FCC-approved Regional Plan) and databases (CAPRAD, CASM, and NIIX).

## Operating Reference

### Operating Guidelines:

The primary responsibility of the radio operator is to pass accurate and timely information from the sender to the receiver and follow through with an accurate and timely response to the sender if needed.

Calls and messages on the radio are known as “traffic.” Groupings of radios designed to handle certain types of “traffic” are called “nets.” Several nets may be operating on the incident:

- **Tactical Net:** This net is used by the crews, engines, etc. This net cannot be monitored by the Incident Command Post (ICP), as it is line-of-sight only. Usually a different frequency is assigned to each division. If someone requests this frequency, locate the ICS Form 205 (Incident Radio Communications Plan) and relay the frequency for the specific division requested.
- **Command/Operations Net:** This is the primary incident radio net. Most of the operational traffic is on this net, usually through a repeater, to operations, overhead or the incident base. An example of this would be instructions from the operations section to the field/base or traffic from one division to another concerning personnel movements, fire behavior, etc.
- **Logistics Net:** Logistics net traffic would be checking with the supply unit to see if items have arrived, tracking locations of vehicles and drivers in the ground support unit, calling the food unit for meal hours, etc.
- **Camp Net:** It is used because most units are back at the camp.
- **Air-to-Ground Net:** This is used almost exclusively by the helibase to communicate with aircraft associated with the incident. This is not monitored by the ICP. If someone requests this frequency, locate the ICS Form 205 (Incident Radio Communications Plan) and relay the frequency.
- **Air-to-Air Net:** This net is used strictly between aircraft. The ICP cannot monitor this frequency. If someone requests this frequency, locate the ICS Form 205 (Incident Radio Communications Plan) and relay the frequency.

The station/radio running the ‘Net’ is called ‘Net Control’.

If there is an emergency on the radio net, say: “All Units, There is a Medical Emergency, Please Clear This Frequency”. Repeat as necessary.

The best radio in the world is of little use if messages are misunderstood or can not be heard because of improper use.

- Official Use Only: Agency radios are used only for official business. Many private citizens have scanners capable of monitoring our frequencies. Cooperating agencies and organizations monitor our frequencies for informational purposes.
- When making contact/calling a station for the first time, use the following procedure. We will use the following message as an example:

Station callsign you are calling: **Shelter**

Your callsign station: **A1AA**

Message: Please advise the count of hot lunch meals you require at your location.

Spoken examples are in **Bold**.

- Press and hold the Push-To-Talk (PTT) button on the side of the radio.
- Speak clearly at your normal volume and rate (try to maintain a steady rhythm, speed, volume and pitch) and say “(callsign of station you are calling), Good (Morning/Afternoon/Evening), this is (your callsign), Over.”  
**Shelter, Good Morning, This is A1AA, over.**
- Wait for their response.
- Say the word “Over” to let the other station know you are finished talking. **Shelter, A1AA, go ahead, over.**
- If you have to step away from the radio (to deliver a message, go to the bathroom, etc.), let Net Control know. **Net Control, A1AA, Over** (wait for Net Control to respond). **Net Control, A1AA, away from the radio for** (however many minutes you think you will need) **minutes, over.** There is no hard and fast rule so don’t panic if you say 5 minutes and you come back 10 minutes later. The key is to let Net Control know you are away from the radio so they or someone else does not try to contact you. Wait for Net Control to acknowledge your request before stepping away.
- When you return to the radio, let Net Control know you are back at the radio. **Net Control, A1AA, over** (wait for Net Control to respond). **Net Control, A1AA, back at radio, over.** Wait for Net Control to acknowledge you are back at the radio.
- If you need to have the message repeated in its entirety, say “Say again” **Shelter, A1AA, say again, over.**
- If you need to have part of a message repeated, say “Say again after (last word you clearly heard)”. **Shelter, A1AA, say again after LUNCH, over** (referring to the message example above).
- If you need to have part of a message repeated, say “Say again from (last word you clearly heard) to (the next word you clearly heard). **Shelter, A1AA, say again from COUNT to REQUIRE, over.**

## Operating Reference

- If the other person is talking to fast, say “**Say again slower**”. **Shelter, A1AA, say again slower, over**
- If the other person is talking to slow, say “**Say again faster**”. **Shelter, A1AA, say again faster, over**. It is very rare that you will need someone to talk faster.
- If the other person is talking too quietly, say “**Say again louder**”. **Shelter, A1AA, say again louder, over**.
- If you are leaving the air (going home/shift change), say “**Clear on frequency**”. **Net Control, A1AA, over** (wait for Net Control to respond). **Net Control, A1AA, clear on frequency, over**. Wait for acknowledgement from Net Control clearing you to leave the channel/frequency. Do not just get up and leave.
- Do not change channels/frequencies unless instructed to do so. If you are instructed to change channels/frequencies, note who told you, what channel/frequency you were instructed to change to, who you are to contact on the new channel/frequency and the current date and time. Inform Net Control about channel/frequency change and say “**Request frequency change**”. **Net Control, A1AA, over** (wait for Net Control to respond). **Net Control, A1AA, request frequency change to channel (#) to contact (other station callsign), over**. Wait for Net Control to acknowledge your channel/frequency change.
- Once you are done with the channel/frequency change, return to the original channel/frequency and let Net Control know you have returned. **Net Control, A1AA, over** (wait for Net Control to respond). **Net Control, A1AA, back on channel/frequency, over**. Wait for Net Control to acknowledge your return to the channel/frequency.
- If a station is calling and Net Control cannot hear them, say “**Relay**”. **Net Control, A1AA, over** (wait for Net Control to respond). **Net Control, A1AA, relay, over**. This informs Net Control that you can hear the station calling and are able to relay their message/traffic. Wait for Net Control to acknowledge your offer to relay (Net Control may or may not want you to act as a relay so don’t take offense if Net Control does not take you up on your offer).
- If you could not hear who called you, ask them to identify themselves. For example, “**Station calling, this is (your call sign), please identify yourself, over**” or “**Station calling, this is (your call sign), please repeat, over**”. **Station calling, this is A1AA, please identify yourself, over** or **Station calling, this is A1AA, please repeat, over**.
- Net Control is the person/callsign who is running the net. A ‘net’ is an organizational way to manage callers on a channel/frequency.

## Message Handling:

- Never take for granted that a message has been received. The receiver should verify receipt of the message. Usually they will say “COPY” to tell you they heard the message. Do not acknowledge a transmission unless you are sure that you have it correct and understand it. If the terminology used in the system is unfamiliar to you, learn the terminology (all messages should be in ‘Clear Text’ or plain English). **Shelter, A1AA, copy, over**
- Caution should be exercised in attempting to explain or amplify a message given to you to transmit. If the person receiving the message indicates doubt as to the meaning of a message, repeat the message verbatim. If the person is still unable to understand the meaning of the message, refer the message to the originator for clarification. Use your best qualities of dialect and enunciation. Pronounce words clearly and somewhat slowly: a rate of about 60 words per minute is proper. Always use **CLEAR TEXT** (no codes, just plain English) when talking on the radio. It is your job to not only answer the radio, but to document all messages into and sent out through the radio by you on your shift. This is especially important because follow-up may be needed later by someone else. Your radio log is the official documentation of what happened. If there is a medical claim or other follow-up action, the log becomes a critical document.
- Message Priorities: Radio traffic becomes heavy at times and it may be necessary to set priorities on the messages to be sent. Please observe the following provisions for precedence’s in connection with written message traffic. These provisions are designed to increase the efficiency of radio communications service both in normal times and in emergencies. Priorities have been established in this order:
  - o **EMERGENCY:** Any message having life and death urgency to any person or group of persons, which is transmitted by you in the absence of regular commercial facilities. This includes official messages of welfare agencies during emergencies requesting supplies, materials or instructions vital to relief of stricken populace in emergency areas. During normal times, it will be very rare. When in doubt, do not use it.
  - o **PRIORITY:** This classification is for a) important messages having a specific time limit b) official messages not covered in the emergency category c) press dispatches and emergency-related traffic not of the utmost urgency d) notice of death or injury in a disaster area, personal or official.
  - o **WELFARE:** This classification refers to either an inquiry as to the health and welfare of an individual in the disaster area or an advisory from the disaster area that indicates all is well. Welfare traffic is handled only after all emergency and priority traffic is cleared. The Red Cross equivalent to an incoming Welfare message is DWI (Disaster Welfare Inquiry).

## Operating Reference

- o **ROUTINE:** Most traffic in normal times will bear this designation. In disaster situations, traffic labeled Routine should be handled last, or not at all when circuits are busy with higher precedence traffic.
- Plan Your Message: Make your message straight to the point by planning it. Know what you are going to say before you push the microphone button. Do not wait until you start transmitting and then do your thinking out loud, on the radio.
- Profanity: By planning your message you are also less apt to use profanity. Profanity is not allowed and is a violation under Federal Communications Commission (FCC) rules.
- Report Facts: Your messages should contain only facts, not opinions, unless your opinion is asked for.
- Brevity: Your messages should be to the point, factual, and brief. Avoid the use of unnecessary words.
- Clarity: You need to speak clearly, and at a constant speed to avoid misunderstandings. Speaking clearly is essential.
- Normal Conversation: Talk into the microphone at your normal conversation level and speed. If you speak too loudly or too fast, your voice and the message may be distorted.
- Unnecessary Noise: All sounds and noises cannot be avoided. When possible move away from excessive noise and post notices that advise personnel coming in to remain as quiet as possible.
- If you have a long message, break transmission (stop transmitting/release the Push-To-Talk button) every 30 seconds or so and wait before continuing. This allows time for the receiver to write down the message and creates a break on the frequency in case emergency traffic has to break in. Try to keep messages short and concise to avoid tying up the radio channel for too long. **Shelter, A1AA, 10 reducer's inch and a half to one inch, break.** (Pause) Then start up again **Shelter, A1AA, 100 feet of inch and a half hose, etc.** The receiver should reply with "COPY" after each break to let you know they have heard the message sent.
- If your message has numbers in it, when you get to that part of the message say "Numbers" **Shelter, A1AA, Numbers,** (say your numbers).
- If your message contains mixed (letters and numbers), when you get to that part of the message say "Mixed Group" **Shelter, A1AA, Mixed Group,** (say the part of the message containing the mixed letter and number group).
- To return from either of the above to regular text, say "Letters" **Shelter, A1AA, Letters** and continue with your message.
- If your message contains long or complicated words, say "I spell" **Shelter, A1AA, I spell.** Use the phonetic alphabet located in this manual.
- If you have a list of supplies, send it using a fax machine rather than using the radio. This ensures accuracy, provides a copy and does not tie up the radio channels.
- Do not change a single word in a formal relay message: Record and transmit it "as is". If the message seems unclear, clarify with the originator of the message.
- Do not acknowledge a message if you are unsure of its contents or meaning: Do not pass on unclear information.
- VHF/UHF (Very High Frequency/Ultra High Frequency) communications is half-duplex. This means that communications is in one direction at a time (you talk while the other person listens, then they talk while you listen). Your telephone is full duplex (which means you can both talk and listen at the same time).

### Things to NEVER do:

- Do not talk to the media. If you are entering or leaving your Assignment/COOP/AWL (Continuity of Operations/Alternate Work Location) site and anyone (probably from the media) approaches you and wants to talk to you about what is going on there, tell them you are not authorized to discuss anything with them and they need to contact the Public Information Officer (PIO).
- **DO NOT EVER SAY ANYTHING THAT CAN IDENTIFY YOU OR THIS AS GOVERNMENT (Local/State/Federal) OR ARES! ALWAYS USE CALL SIGNS.**
- If there is an injury or fatality, **DO NOT EVER ANNOUNCE THE PERSON(S) NAME OVER THE AIR!** This is a direct violation of Health Insurance Portability and Accountability Act (HIPAA) rules. There might be someone listening on a scanner (the news media often does this). Along with this, do not use your name or anyone else's name over the air for the same reasons. Always use your call sign.
- Profanity is not allowed and is a violation under Federal Communications Commission (FCC) rules.

## **Operating Reference**

### **Transition with Replacement Personnel:**

Brief your replacement on major events from the concluding operational period, unusual situations or conditions, and information required by the Communications Leader. The relief operator should arrive 30 minutes before their shift is supposed to start. This gives them time to be briefed and to familiarize themselves with the working environment. Provide written notes about items that need follow-up during the upcoming operational period. Include the following information:

- o Operations Status:
  - Current activities
  - Orders not filled
  - Messages not delivered
  - Messages awaiting reply
  - Site statuses, including new sites opening or closing
- o Equipment Status:
  - Incoming order(s)
  - Equipment being demobilized
  - Frequency change(s)
  - Phone number change(s)
  - Shift changes/rotations
- o Any unusual communications situations:
  - Operational period change(s)
  - Arrival of new resources
  - Recent or on-going medical emergency(s)

### **Transfer of Command**

The process of moving the responsibility for incident command from one Incident Commander to another is called “transfer of command.” It should be recognized that transition of command on an expanding incident is to be expected. It does not reflect on the competency of the current Incident Commander. There are five important steps in effectively assuming command of an incident in progress.

**Step 1:** The incoming Incident Commander should, if at all possible, personally perform an assessment of the incident situation with the existing Incident Commander.

**Step 2:** The incoming Incident Commander must be adequately briefed. This briefing must be by the current Incident Commander, and take place face-to-face if possible. The briefing must cover the following:

- Incident history (what has happened)
- Priorities and objectives
- Current plan
- Resource assignments
- Incident organization
- Resources ordered/needed
- Facilities established
- Status of communications
- Any constraints or limitations
- Incident potential
- Delegation of Authority

The ICS Form 201 is especially designed to assist in incident briefings. It should be used whenever possible because it provides a written record of the incident as of the time prepared. The ICS Form 201 contains:

- Incident objectives.
- A place for a sketch map.
- Summary of current actions.
- Organizational framework.
- Resources summary.

**Step 3:** After the incident briefing, the incoming Incident Commander should determine an appropriate time for transfer of command.

### **Operating Reference**

**Step 4:** At the appropriate time, notice of a change in incident command should be made to:

- Agency headquarters (through dispatch).
- General Staff members (if designated).
- Command Staff members (if designated).
- All incident personnel.

**Step 5:** The incoming Incident Commander may give the previous Incident Commander another assignment on the incident. There are several advantages of this:

The initial Incident Commander retains first-hand knowledge at the incident site. This strategy allows the initial Incident Commander to observe the progress of the incident and to gain experience.

**Operating Reference**  
**Instructions for Filling out the General Message (ICS FORM 213-OS) Form**

**Purpose:** The General Message is used by:

- Incident personnel to record incoming messages which cannot be orally transmitted to the intended recipients; Command Post and other incident personnel to transmit messages to the Incident Communications Center for transmission via radio or telephone to the addressee;
- Incident personnel to send any message or notification to incident personnel which requires a hard-copy delivery; Incident personnel to place resource orders.

**Preparation:** This form is prepared by any incident personnel needing to transmit a hard-copy message. The recipient should send a timely reply to the originator, as necessary.

**Distribution:** Upon completion, the General Message may be hand-carried to the addressee or to the incident Communications Center for transmission. Originator retains a copy of the form. All completed original forms MUST be given to the Documentation Unit.

| Item # | Item Title               | Instructions                                                                                  |
|--------|--------------------------|-----------------------------------------------------------------------------------------------|
| 1.     | Incident Name            | Enter the name assigned to the incident.                                                      |
| 2.     | Date and Time of Message | Enter the date and time of message origination.                                               |
|        | Message Number           | Enter a tracking number of the message for later reference.                                   |
| 3.     | To                       | Enter name and ICS position of message recipient.                                             |
| 4.     | From                     | Enter name and ICS position of message sender.                                                |
| 5.     | Subject                  | Indicate the message subject.                                                                 |
| 6.     | Message                  | Enter message.                                                                                |
| 7.     | Reply                    | This section to be used by the unit/person who receives the message to reply to your message. |
| 8.     | Signature/Position       | Enter name and position of person replying to this message.                                   |
|        | Date/Time of reply       | Enter date (month, day & year) and time of reply (24-hour clock).                             |

Please be civil and do not put anything mean or degrading in the message as these message forms may become permanent files for the incident and may be subject to review later.

| Precedence                         | <p>EMERGENCY: Any message having life and death urgency to any person or group of persons, which is transmitted by you in the absence of regular commercial facilities. This includes official messages of welfare agencies during emergencies requesting supplies, materials or instructions vital to relief of stricken populace in emergency areas. During normal times, it will be very rare. When in doubt, do not use it.</p> <p>PRIORITY: This classification is for a) important messages having a specific time limit b) official messages not covered in the emergency category c) press dispatches and emergency-related traffic not of the utmost urgency d) notice of death or injury in a disaster area, personal or official.</p> <p>WELFARE: This classification refers to either an inquiry as to the health and welfare of an individual in the disaster area or an advisory from the disaster area that indicates all is well. Welfare traffic is handled only after all emergency and priority traffic is cleared. The Red Cross equivalent to an incoming Welfare message is DWI (Disaster Welfare Inquiry).</p> <p>ROUTINE: Most traffic in normal times will bear this designation. In disaster situations, traffic labeled Routine should be handled last, or not at all when circuits are busy with higher precedence traffic.</p> |
| HX                                 | <p>HXA: (Followed by number) Collect landline delivery authorized by addressee within _____ miles. (If no number, authorization is unlimited.)</p> <p>HXB: (Followed by number) Cancel message if not delivered within _____ hours of filing time; service originating station.</p> <p>HXC: Report date and time of delivery (TOD) to originating station.</p> <p>HXD: Report to originating station the identity of station from which received, plus date and time.</p> <p>Report identity of station to which relayed, plus date and time, or if delivered report date, time and method of delivery.</p> <p>HXE: Delivering station get reply from addresses, originate message back.</p> <p>HXF: (Followed by number) Hold delivery until _____ (date).</p> <p>HXG: Delivery by mail or landline toll call not required. If toll or other expense involved, cancel message and service originating station.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Station of Origin                  | Location of station sending message (first amateur handler).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Check                              | Total word count of actual message.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Number                                                      | Message number, used for tracking purposes. Begin with 1 each month or year.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Precedence                                                  | <p>EMERGENCY: Any message having life and death urgency to any person or group of persons, which is transmitted by you in the absence of regular commercial facilities. This includes official messages of welfare agencies during emergencies requesting supplies, materials or instructions vital to relief of stricken populace in emergency areas. During normal times, it will be very rare. When in doubt, do not use it.</p> <p>PRIORITY: This classification is for a) important messages having a specific time limit b) official messages not covered in the emergency category c) press dispatches and emergency-related traffic not of the utmost urgency d) notice of death or injury in a disaster area, personal or official.</p> <p>WELFARE: This classification refers to either an inquiry as to the health and welfare of an individual in the disaster area or an advisory from the disaster area that indicates all is well. Welfare traffic is handled only after all emergency and priority traffic is cleared. The Red Cross equivalent to an incoming Welfare message is DWI (Disaster Welfare Inquiry).</p> <p>ROUTINE: Most traffic in normal times will bear this designation. In disaster situations, traffic labeled Routine should be handled last, or not at all when circuits are busy with higher precedence traffic.</p> |
| HX                                                          | <p>HXA: (Followed by number) Collect landline delivery authorized by addressee within ____ miles. (If no number, authorization is unlimited.)</p> <p>HXB: (Followed by number) Cancel message if not delivered within ____ hours of filing time; service originating station.</p> <p>HXC: Report date and time of delivery (TOD) to originating station.</p> <p>HXD: Report to originating station the identity of station from which received, plus date and time. Report identity of station to which relayed, plus date and time, or if delivered report date, time and method of delivery.</p> <p>HXE: Delivering station get reply from addresses, originate message back.</p> <p>HXF: (Followed by number) Hold delivery until ____ (date).</p> <p>HXG: Delivery by mail or landline toll call not required. If toll or other expense involved, cancel message and service originating station.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Station of Origin                                           | Location of station sending message (first amateur handler).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| The Wilderness protocol (see page 101, August 1995 QST) calls for hams in the wilderness to announce their presence on, and to monitor, the national calling frequencies for five minutes beginning at the top of the hour, every three hours from 7 AM to 7 PM while in the back country. A ham in a remote location may be able to relay emergency information through another wilderness ham that has better access to a repeater. National calling frequencies: 52.525, 146.52, 223.50, 446.00, 1294.50 MHz. |                                     |                                                                                                                                                                                                                                                                      |                                                                        |                                            |             |

| <ul style="list-style-type: none"> <li>144.390 MHz is the National APRS frequency. Set a CT tone of 100 Hz to “quiet” the radio and it will “beep” if there is a station within a mile or two of your position. Along with doing that, monitor 147.525 MHz and when the radio “beeps” from a nearby station, ask who is calling CQ.</li> </ul> |                       |               |       |         |         |         |      |         |
